Modular Handrails

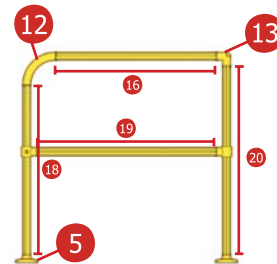

Staged Run

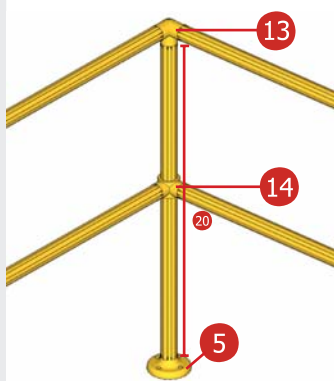

Straight Run

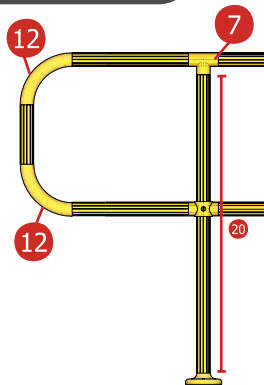

End Bend Finish

90 Degree Turn

End Loop Finish

All tube sizes are calculated to achieve 1000mm centres and uprights to achieve 1100mm.

Q. What if my area does not fall exactly on a multiple of 1000mm?

A. Simply cut the tube down to achieve your overall length. e.g. 1800mm is 1 No. 1000mm section and 1 No. 800mm section (this section has been cut).

Key Benefits

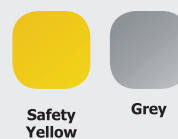

- * Load tested to 0.75Kn
- * Meets DDA obligations, Part "M" of the Building Regs

The different applications shown are just some of the various possibilities when using the modular hand rail system as a solution

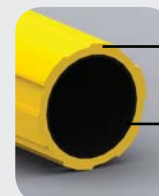

Anti vandal fixings included with components
