

# Traffic Management Displays

Austin Reynolds supplies a comprehensive range of vehicle activated and interactive road signs which have been designed to meet the needs of today's traffic control requirements.

Whether your need is for reducing speed on a country or urban road, within a housing estate or within the confines of an industrial park or manufacturing plant, Messagemaker can offer a solution to fit your requirement.

The standard range of traffic control systems includes a variety of speed limit signs, speed camera signs, road warning signs and school safety displays. In addition to the standard range Messagemaker can also offer a bespoke design and build service.
